

## Fondex Shermont becomes Les Laboratoires Shermont

In June 2006, Fondex Outaouais and Fondex Hautes-Rivières joined the Teknika HBA team under the division Laboratoires Shermont to better meet the needs of clients through access to an expanded network of professionals. The companies have since been providing services under the name Fondex Shermont.

As a natural progression in the merger process, please note that effective June 1, 2010, Fondex Shermont is now operating under the name Les Laboratoires Shermont. This division name change does not in any way affect the quality services provided by the team's members. Our services and team remain the same and are available to successfully complete projects for our clients, who, since the merger, have benefited from additional expertise and added-value solutions.

The Laboratoires Shermont team specializes in soil and materials engineering, geotechnical, environment and roofing. It includes more than 300 employees located in 15 offices. Les Laboratoires Shermont has been a member company of Teknika HBA since 1997, which in turn joined Trow Global in 2008. Together, they form a company of more than 3,000 professionals, including specialist engineers and technical experts from over 100 Canadian, U.S. and international locations.

For additional information, please contact Marc Drouin, Senior Manager of the Outaouais region, at 819-778-1770.
