

FOR IMMEDIATE RELEASE

LES LABORATOIRES SHERMONT RENEWS CONTRACT IN ALGERIA

Brampton, Ontario – December 18, 2009 – Les Laboratoires Shermont Inc., a Trow Global company, is pleased to announce that it has just renewed its external quality control contract with COJAAL, a Japanese consortium, for the construction of the eastern portion of the Trans-Algerian Highway between Bordj Bou Arreridj and the Tunisian border, which represents over 400 km of roadway and engineering structures. The contract, which is valued at \$23 million, will span two years. This is the largest contract ever obtained by the firm.

Since 2008, Les Laboratoires Shermont has played a key role in this major highway construction project in Algeria. The external control mandate, in support of internal controls, ensures that the work completed by COJAAL complies with the agreement between the consortium and the Algerian government.

“Trow Global is extremely pleased about this news,” said Vlad Stritesky, President and CEO of Trow Global. “We’re very proud of our involvement in this massive project, and this contract renewal is a testament to the quality of work and excellent service our team has been delivering to our client in Algeria.”

Eric Charron, President of Les Laboratoires Shermont and Project Manager, added: “For two years now, our professionals in quality management and soil and materials engineering have overseen the compliance of practices and the progress of this large scale project. I’m proud to say that our team’s expertise extends far beyond technical know-how. A momentous, multicultural synergy has developed over the past 24 months and has helped to maximize the knowledge and experience of resources from different backgrounds.”

The professionals involved in the project thus far will remain based in Algeria. However, due to the sheer magnitude of the project, the firm expects to hire additional resources.

About Les Laboratoires Shermont

Les Laboratoires Shermont is a multidisciplinary firm specializing in soil and materials engineering, geotechnical, environment and roofing. It relies on a team of 300 employees located in 15 offices. Les Laboratoires Shermont joined Trow Global in 2008 upon the merger of Trow and Teknika HBA, of which they were a member company since 2005.
